

GNOME 2.26.3 Out

Written by Kir

Thursday, 02 July 2009 12:24

Softpedia has the news...

"The GNOME developers, through Lucas Rocha, have announced early this morning in a press release that the last maintenance release of the popular GNOME 2.26 [desktop](#) environment is now available for download. Just like the previous maintenance releases, GNOME 2.26.3 is here mainly to fix many of the remaining bugs, but to also introduce a few interesting features.
.."
