----- Eaton [1], a global technology leader in
electrical products and long time Debian partner, has donated several large-capacity
uninterruptible power supplies (UPSs) and intelligent power distribution units (PDUs) for
Debian's core infrastructure located in Darmstadt, Germany and Vienna, Austria. 1:
http://www.eaton.com "Not only do we, at Eaton, strongly back the principle of freely available
open source software, we are also finding that our customers increasingly prefer to work with
open source packages, especially with Linux and related systems," said Arnaud Quette, Eaton
OpenSource Solutions Lead and Debian Developer. "Most Debian porter Read more at [Debi
